

Subject: Strange tribal trick heals Neuropathy FAST

Hi,

If you suffer from neuropathy, then one of the most frustrating things would be the constant pain and tingling or numbness sensation in your hands and feet.

You might find it to be extremely hard for you...even when you eat reasonably well.

You might be feeling loss of balance and co-ordination.

Do you often experience muscle weakness, especially in the feet?

The good news is...

One of my closest friends, **Mark Fellers** has just discovered this [strange trick](#) from the Tsimane tribe in Mexico that can heal neuropathy extremely fast!

Once I tried this myself, I had to share it with you...
